### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 08 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Status of Application/Amendment/Claims***

Applicant's response filed November 8, 2004 has been considered. Rejections and/or objections not reiterated from the previous office action mailed May 5, 2004 are hereby withdrawn. The following rejections and/or objections are either newly applied or are reiterated and are the only rejections and/or objections presently applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: fascilitated appears to be misspelled. Appropriate correction is required.

The instant claim amendment filed November 8, 2004 is not considered to be in compliance with 37 CFR § 1.121, because the status of all claims has not been listed. The application as originally filed listed claims 1-10. During prosecution, claims 2-10 were canceled, and should be listed on each new amendment as "canceled". The amendment filed November 8, 2004 lists only claims 4-5 as canceled. See 37 CFR § 1.121.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1635

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith *et al.* (Mol. Immunol. 1995. Vol. 32, No. 17/18, pp 1339-1344).

Claim 1 is drawn to a method of decreasing CD63 facilitated human immunodeficiency virus entry into macrophage cells susceptible to infection with a strain of HIV, the method comprising exposing the cells to an anti-CD63 antibody in an amount effective to bind the anti-CD63 antibody to CD63 present in the cells, whereby the CD63 facilitated human immunodeficiency virus entry into the cells is decreased.

Smith teaches administration of an anti-CD63 antibody to cells of a rat basophilic cell line transfected to express the human CD63 polypeptide. While Smith *et al.* is silent as to the effect that such antibody administration would have on the ability of HIV to enter cells, the method steps of Smith *et al.* are considered to be identical to those of the instant claim, and as such, the effect of preventing HIV entry is considered to be an inherent feature of administration of an anti-CD63 antibody, particularly since the instant specification teaches that CD63 is utilized by HIV during entry. Accordingly, because Smith *et al.* is considered to teach the instant method steps, Smith *et al.* anticipates the instantly claimed invention.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
